European Union customers please see note on page 2

Name: _____ Title/Organization: _____
Address: _____
City: _____ State/Province: _____ ZIP/Postal code: _____
Country: _____
Email address: _____ Fax: _____
Telephone (required): _____

Payment information

I am including a check for the full amount. (Make check payable to PictureCode LLC.)

I wish to pay by credit card:

Card type: American Express Discover MasterCard Visa
Card number: _____ Expiration date: _____
Card verification number (see below): _____
Name on card: _____
Billing address: _____
City: _____ State/Province: _____ ZIP/Postal code: _____
Country: _____

I authorize use of the credit card referenced above for purchase of merchandise/services from PictureCode LLC:
Cardholder signature: _____ Date: _____

The card verification number, if present, is the last 3-digit number printed on the back of your Visa, MasterCard, or Discover card, or the 4-digit number printed (not embossed) on the front of your Amex card.

Your billing address should match the address on your monthly credit card statement.

Product descriptions

1. Noise Ninja license keycodes

License keycodes activate features that are disabled or restricted in the trial version of Noise Ninja. Bundle licenses work with both the PhotoShop plug-in and the standalone version of Noise Ninja. Standalone licenses work only with the standalone application. The Pro licenses activate features typically required for professional and serious amateur workflows, while the Home licenses are intended for more casual users.

Pro Bundle: Activates all features in both the PhotoShop plug-in and standalone versions of Noise Ninja. Activated features include 16-bit image support (48-bit pixels), batch processing, and multiprocessor execution.

Pro Standalone: Like the Pro Bundle license, but only activates features in the standalone version of Noise Ninja.

Home Bundle: Activates 8-bit image support (24-bit pixels), non-batch processing, and single-processor filtering on both the PhotoShop plug-in and standalone versions of Noise Ninja.

Home Standalone: Like the Home Bundle license, but only activates features in the standalone version of Noise Ninja.

2. Other products

Profiling chart: Printed version of the profiling chart (calibration chart) used to create noise profiles for Noise Ninja. Note that a JPEG image of the chart is included for free with the Noise Ninja software installation.

CD-ROM: A CD-ROM containing the Noise Ninja software. Includes both the plug-in and standalone versions of Noise Ninja. Does not include a license keycode. The latest version of the software can be downloaded for free from <http://www.picturecode.com/download.htm>

Note to European Union customers

Due to European Union regulations concerning VAT collection for sales to private individuals in EU countries, license keycodes will be delivered by email to an individual (i.e. a non-business purchaser) only if you place your order through our online store at www.picturecode.com/purchase.php. If you place your order by fax or mail, we will ship a printed version of the keycodes to the delivery address specified on your order form, and you may have to pay VAT when the shipment goes through customs. We apologize for the inconvenience, but we are an American-based business and we are not currently set up to handle the accounting, tracking, and reporting requirements for EU VAT. Our online store, however, utilizes a British intermediary that complies with EU VAT requirements.
